

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Freshly retired, after spending several years working with his brother to develop their crane company into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

While on their trip, John spent time conversing with previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a considerable marketplace for a product that could quickly and safely lift people in the air to accomplish maintenance and other building services.

After their return from holiday, John set up a business with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into several global marketplaces and continues to cultivate contemporary machines to ensure that clients are able to become safer and more well-organized within their workplace.
