

Aerial Work Platforms

Aerial Work Platforms - There are a variety of forklift accessories available on the market. They could help transform your lift truck so that you could expand your ability to pick objects up or finish clean up tasks and material handling with less effort.

A lot of the attachments are particularly designed in order to fit on the forks themselves. Fork extensions for example, are used whenever you need much more blade length, that increases lifting capability. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are another type used when transferring rolled material to be able to ensure it does not roll off of the typical flat forks.

Lifting attachments can be pivoting and telescoping crane attachments. They come in various kinds. These accessories are usually utilized for transporting poles, lumber, metal bars or whichever sort of bulky stuff. Other attachments like various kinds of hook plates and hooks are accessible to lift stuff using a sling or chain. Magnetic lifters and slab lifters are other things which can be used together with hook attachments. Slab lifters are specialized attachments that are meant for carrying various materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that attach to your lift truck so as to make transferring rolls of carpet much easier. The attachment hooks onto the lift truck's forks and has a pole that goes through the middle of the carpet roll.

There are several other kinds of forklift attachments which can be utilized for facility maintenance such as snow blades. These forks connect to front end loaders and can transfer materials like dirt, soil and snow. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the lift truck forks connect onto for sweeping big spaces such as warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and easy.

Material spreaders are other attachments utilized on lift trucks. These spreaders are handy for a range of applications such as spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Another optional lifting accessory are work platforms. These can be used by many various businesses day by day. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few units may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location utilizing the forklift. Larger platform models have extra space for staff to be able to carry tools and other essential items for the job. Often work platforms are made of poly material or steel.
