

Clark Forklift Part

Clark Forklift Parts - At this time, there are at least 350,000 Clark lift trucks performing worldwide, and more than 250,000 in use in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specific components designed for 20 unique models of forklifts and automated equipment. Your regional Clark Supplier is your complete source for availability of all your parts needs supplied by Clark Totalift.

Clark has a extraordinary Parts Distribution team. The components warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most impressive dealer support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

Clark proudly remains an progressive leader of the industrial equipment industry, revolutionizing protection features such as the worker restraint system. This exceptional dedication to safety is currently a customary feature on every lift truck.

Clark has a uncompromising mission to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental restrictions, thus placing them in a prevailing industry position.

Clark has selected the system of "Lean Manufacturing" at all of its assembly plants because this system is extremely economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most effective ways for production plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to develop the effectiveness and excellence of their products while minimizing expenses. The contemporary value engineering agenda combines modern product improvement and provides improved customer support and service within the industry.
